Skin Thickness: 18 mm
Insulin Level: 70 uU/mL
BMI: 24 kg/m²
Diabetes Pedigree Function: 0.5
Age: 35

Doctor's Comments

Glucose level (110 mg/dL) is within normal range but should be monitored due to family history of diabetes.
Blood pressure (80/120 mmHg) is slightly elevated; recommend continued observation.
BMI (24 kg/m²) is within a healthy range, indicating stable weight.
Symptoms of dizziness and hunger may warrant further investigation; suggest a follow-up appointment to assess potential underlying causes.
